GRAZING TOLERANT

HIGH YIELDS

QUICK FACTS

**GINGER** is an early season Kentucky bluegrass that will produce very high yields. It is tolerant of close grazing, palatable and nutritious for all livestock - especially horses. It will spread aggressively by rhizomes and boasts a leaf width and length nearly twice that of other bluegrasses. Ginger creates excellent cover with a low percentage of weeds. For early spring green-up, count on Ginger.

ADAPTATION

GRAZING	EXCELLENT
HAY	EXCELLENT
SILAGE	GOOD
GREEN CHOP	GOOD
OVERSEEDING	EXCELLENT
FROST SEEDING	EXCELLENT

**GINGER** exhibits exceptional plant vigor, forage yielding ability, stress tolerance and disease resistance. A very early variety that performs well under various grazing regimes.

# Ginger

Kentucky Bluegrass

- ✓ HIGH YIELDS
- ✓ MEDIUM DENSITY
- ✓ DISEASE RESISTANT
- ✓ EARLY HEADING
- ✓ COLD TOLERANT
